RE: Graphical Interface

Dear Jeff:

You asked that I comment on the service that you've provided to Cohen, Placitella & Roth, P.C. Let me start by saying it is my pleasure to do so. After our initial meeting, Graphical Interface assessed our I.T. configuration, our needs and how those would evolve, and presented us with some clear, understandable solutions and helped us assess which would best suit our needs. More importantly, Graphical Interface delivered: on the day of our change over, your technicians were at our offices, dedicated to our job, quick to take care of any glitches and did not leave until we were running as promised. What was particularly important for my partners and me was your honest communication. There was no double talk, no excuses; issues were anticipated and your staff was available to take care of each as it arose - quickly and at any time. Since then, Graphical Interface has proved its worth by being available at any time to address questions we have, changes we are considering or problems as they arise. In short, we view Graphical Interface as a reliable, valuable part of our team. By doing what you say you will, and doing it well, you allow us to do what we do best. Thanks. As you already know, I have been quick to recommend you to friends and colleagues.

Very truly yours,

HARRY M. ROTH
