

Dear future clients,

This is an easy letter to write as I have nothing but great recommendations for Jeff Platt and his team at Graphical Interface.

All business owners know the dilemma of growing a business. You want someone just like you to work for you. You want someone with a high work ethic, integrity, and someone to finish the job.

You can count on Graphical Interface to help you grow your business and to get it going when it is down.

Don't fall for a neat little VW and quirky slogan.— Jeff's the real deal!

Graphical Interface is accessible, thorough, and competitive in their fees. They always check their work twice. They always check the system before they leave so the system starts in the morning.

And Jeff is creative. **He'll listen to you** then design what you need. There is never a conflict of interest with equipment because **GI** does not sell equipment.

GI can use *Remote Desktop*. Jeff and his team can work on your systems from a remote location. They literally are 24/7

You won't regret choosing Graphical Interface!
They're the best.
