

JEST NOTES & BASKETS, LLC

Designed to Build Your Business

If you have ever suffered from chronic pain, then you KNOW how distressing it can be over time. You think you have to live with it...you come to believe that no one can make it go away or make it better.

My computer problems were a lot like that until I met Jeff Platt from Graphical Interface. Jeff fixed issues that I had “worked around” for years. Not only did he completely alleviate my computer pain, but he did so with a terrific sense of humor. Most amazingly: **he answers the questions that I ask** in a way that a non-techie can comprehend. Mind you, he doesn’t talk down to me; he simply explains things in English.

He and his team are available, responsive and competent. They have diagnosed and walked me through fixes via phone so that I can get back to work with the least amount of down time and frustration. Their training is thorough. Because Jeff is a valuable resource for me to offer my clients, he elevates the level of overall service I can provide to my customer base.

I can still remember how often I wanted to hurl my computer out of a window, but it is a fading memory. I simply cannot recommend Graphical Interface enough!

Sincerely,

Cheryl Pliskin, Owner
